Redding, Ca 96002

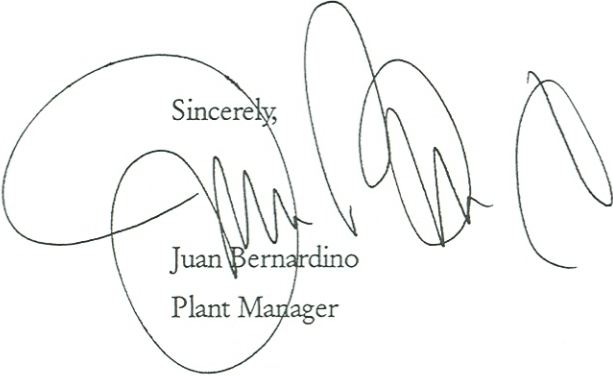

Mr. Dan Warner

We are concerned that the Tentative Waste Discharge Requirements for Fawndale Rock & Asphalt that has been proposed for adoption on October, 25th and 26th 2007 will put Fawndale Rock & Asphalt in Violation for the Maximum Contaminant Levels (MCLs) that are proposed for aluminum, iron, and manganese for receiving water limitations.

Also Fawndale Rock & Asphalt is one of three permits up for renewal within the next few months, all three facilities are located in the same area and have a lot of similarities, but we also realize that permits are site specific. At this time we would like to request the opportunity to review and receive any benefits that may come with any and all current permits that maybe up for renewal in the near future.

If you have any questions please feel free to contact me at the office (530) 246-4292.

Sincerely,

Juan Bernardino
Plant Manager
